What IT teams need

IT Efficiency
Reduce the time and complexity of making software available in campus labs and on managed devices.

Accessibility
Make all apps available in all labs and open-access learning areas, including 24/7 access for your students on any device.

Reduced Workload
And most importantly, no more grey hairs (don't hold us to this) with a single point of management for ALL your academic apps.

What students love

Freedom
Access to all their apps, anywhere at anytime, including on their own devices (BYOD).

Flexibility
Better experience, no slow load times, just instant access, wherever and whenever, with their mates.

Simplicity
Easy, 1-click access to their software without having to think twice, so they can focus their time more effectively.

How to make your CIO happy

Provide equity of access
Give students a consistent point of access for software on any device, wherever, whenever.

Give students a better IT service
Provide software on demand to make the student experience even more awesome and increase enrollment/retention.

Make IT more efficient, for less
Simplify the way you make software available and reduce the costs associated with complicated virtualization solutions.
